Performance SERIES

It's a known industry secret that DLS Performance series give you unsurpassed sound quality in it's price range. The core factors are that good design and a clever choice of materials gives sound performance way beyond what you might expect. Performance series comes as Coaxials, a range of 2-way component kits and some of the markets best sounding 6x9". Solid construction with durable materials guarantees many years of true DLS sound that satisfies even the most hardcore music enthusiast!

Reference SERIES

We know that you'll be surprised with the musical details in our exclusive Reference series speakers. Rich and powerful bass sound combined with crystalclear treble and embracing midrange which really makes you feel the music's soul all through your body and mind. You will find 2- and 3-way systems from 4" to 6,5". Best combined with one of DLS Reference series amplifiers.

RCS5.2

Woofer	5,25"/130mm

Amplifier RANGE

DLS Car Audio amplifiers are available in three lines, just as our speakers. The Competition series is our top line. These well-sounding amplifiers are among the best available and are often used for competition. Reference series amplifiers are also used for competition and have a warm nice sound character that pleases most ears. Performance series are beautiful amplifiers suitable for everyone who wants good amplifiers at a reasonable price.
